SUMITOMO BIORATIONAL

BounceBack®

NUTRITION

PRODUCT BENEFITS

IMPROVED CROP QUALITY

Enhances calcium mobility to support improved crop quality

HEAT STRESS MITIGATION

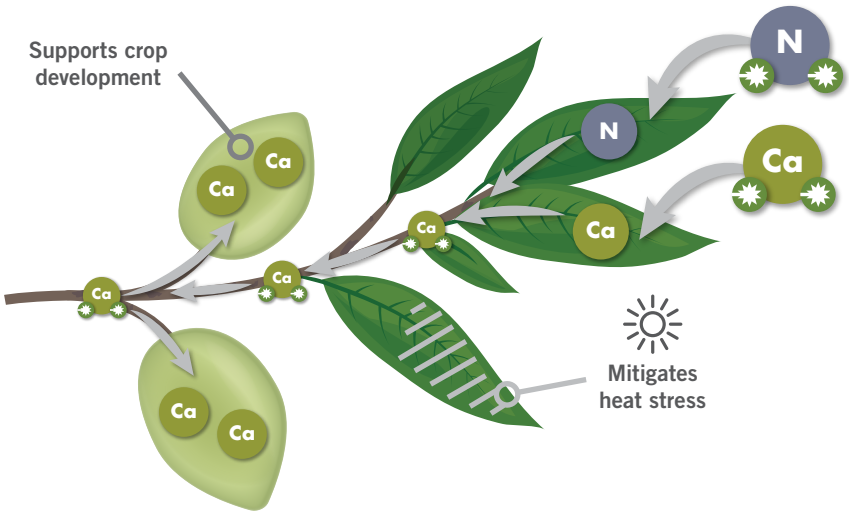

Supports rapid relief and recovery from heat stress

CARBOHYDRATE & SUGAR MOBILITY

Aids movement of carbohydrates to the developing fruit or grain to maximize yield

BounceBack® is a calcium and nitrogen product built with our Transit® biostimulant and plant extracts, designed for high nutrient mobility, heat stress recovery, and crop quality.

High temperatures can disrupt photosynthesis and respiration, limiting plant function and compromising crop development and quality. BounceBack combines our Transit biostimulant with targeted calcium and nitrogen nutrition to improve nutrient mobility and support heat stress recovery, helping plants maintain healthy growth and crop quality under challenging conditions.

MODE OF ACTION

Our Transit biostimulant in BounceBack improves the mobility of calcium and nitrogen in the xylem and phloem, helping plants make more efficient use of applied nutrition.

Ca Calcium supports cellular strength and plant structure for improved crop quality.

N Nitrogen supports chlorophyll production, photosynthesis, and healthy plant growth.

BounceBack®

NUTRITION

Contact your Sumitomo Biorational representative to discuss product fit, use, and application for optimal performance.

GUARANTEED ANALYSIS

Total Nitrogen (N) 4.0%
4.0% Nitrate Nitrogen
Calcium (Ca) 8.0%
Derived from: Calcium gluconate and calcium nitrate.

POWERED BY TRANSIT®

USE RATE	APPLICATION TIMING
1 – 6 qt/ac	Any time during the growing season; repeat as needed.

APPLICATION NOTES

- For foliar applications, ensure thorough coverage for optimal nutrient uptake and apply under favorable growing conditions to maximize absorption.
- Apply during periods of active crop growth and anticipated periods of heat stress, as directed by the product label.
- Integrate with existing crop protection or fertility programs when appropriate.
- Conduct a standard jar test before tank mixing.
- Refer to the product label for complete application instructions and crop-specific use directions.
