SUMITOMO BIORATIONAL

SuperSede® Small Grains

BIOSTIMULANT SEED TREATMENT

PRODUCT BENEFITS

BETTER GERMINATION

Improves germination rate for plant uniformity and stand count

ENHANCED GROWTH

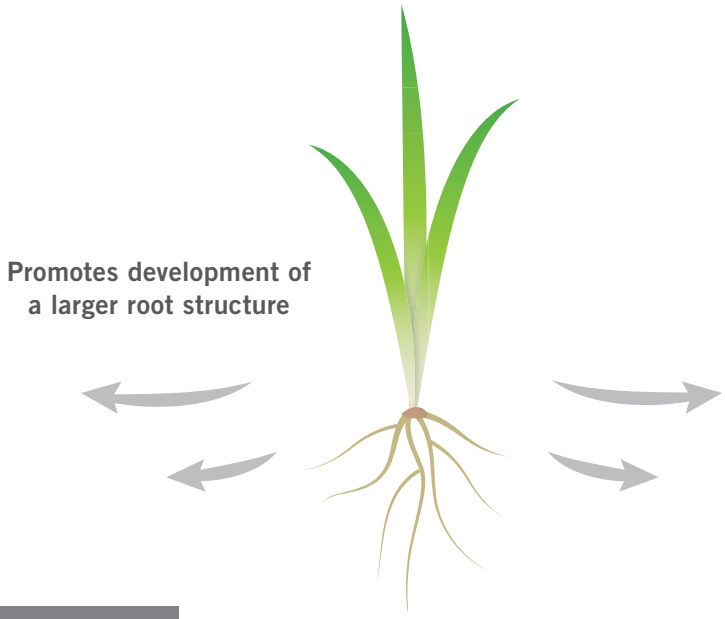

Promotes shoot growth, root establishment

TARGETED SMALL GRAINS NUTRITION

Provides key nutrients to support seedling growth

SuperSede® Small Grains is a seed treatment powered by Transit®, designed with key nutrition for small grains including wheat, barley, and rice.

Successful crop establishment begins with rapid germination and early root development; however, weather after planting does not always facilitate strong growth. SuperSede Small Grains combines Transit with key nutrition to improve germination, strengthen early root growth, and establish a more uniform crop stand.

MODE OF ACTION

SuperSede Small Grains supports the down-regulation of catabolic genes to improve germination while stimulating vigorous root growth. At the same time, Transit up-regulates auxin transport pathways, further strengthening root architecture. When combined with key nutrients for small grain germination and establishment, SuperSede Small Grains optimizes crop performance for strong, uniform stand establishment.

GUARANTEED ANALYSIS

Sulfur (S) 1.0%
Manganese (Mn) 0.9%
Zinc (Zn) 2.25%
Derived from: Manganese sulfate and zinc sulfate.

POWERED BY TRANSIT®

CROP	USE RATE	APPLICATION TIMING
Small Grains	1 fl oz per 50 lbs	Seed Treatment

PACKAGE SIZES

- 4x1 gal
- 2x2.5 gal

APPLICATION NOTES

- Apply using seed treatment application equipment with sufficient liquid to ensure even coverage.
- Shake the bottle of SuperSede Small Grains well before use.
- DO NOT use treated seed for food, feed, or oil.
- Can be used with many common fungicides and insecticides.
- Compatibility: Conduct a standard jar test before mixing a slurry.
- Recommended mixing order: Water, polymers, pesticides, SuperSede Small Grains, fertilizers, then remaining water.
