SUMITOMO BIORATIONAL

# SuperSede® Soybean

## BIOSTIMULANT SEED TREATMENT

### PRODUCT BENEFITS

**BETTER GERMINATION**

Improves germination rate for plant uniformity and stand count

**ENHANCED GROWTH**

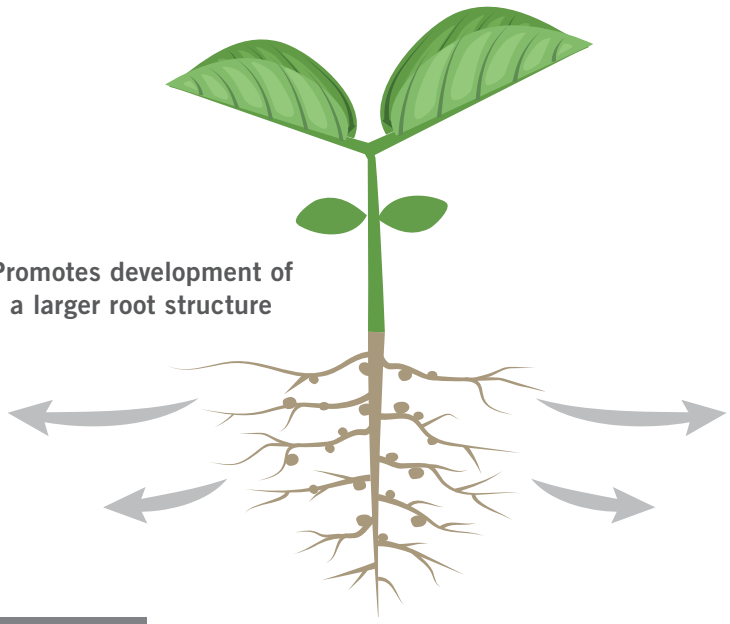

Promotes shoot growth, root establishment, nodulation, and vegetative growth

**TARGETED SOYBEAN NUTRITION**

Provides key nutrients to support seedling growth

**SuperSede® Soybean is a seed treatment powered by Transit®, designed with key nutrition for soybeans.**

Successful crop establishment begins with rapid germination and early root development; however, weather after planting does not always support vigorous early growth. SuperSede Soybean combines Transit with targeted soybean nutrition to improve germination, strengthen early root development, support nodulation, and establish a more uniform crop stand.

### MODE OF ACTION

SuperSede Soybean supports the down-regulation of catabolic genes to improve germination while stimulating vigorous root growth. At the same time, Transit up-regulates auxin transport pathways, further strengthening root architecture and nodule formation. When combined with key nutrients for soybean germination and establishment, SuperSede Soybean optimizes crop performance for strong, uniform stand establishment.

# SuperSede® Soybean

## BIOSTIMULANT SEED TREATMENT

Contact your Sumitomo Biorational representative to discuss product fit, use, and application for optimal performance.

### GUARANTEED ANALYSIS

Boron (B) ..... 0.2%
Cobalt (Co) ..... 0.05%
Molybdenum (Mo) ..... 5.0%
Zinc (Zn) ..... 0.5%
Derived from: Sodium molybdate, cobalt nitrate, boric acid, and zinc sulfate.

POWERED BY TRANSIT®

| CROP | USE RATE | APPLICATION TIMING |
|---|---|---|
| Soybean | 1 fl oz per 50 lbs | Seed Treatment |
| Peanut | | |

### PACKAGE SIZES

- 4x1 gal
- 2x2.5 gal

### APPLICATION NOTES

- Apply using seed treatment application equipment with sufficient liquid to ensure even coverage.
- Shake the bottle of SuperSede Soybean well before use.
- DO NOT use treated seed for food, feed, or oil.
- Can be used with many common fungicides and insecticides.
- Compatibility: Conduct a standard jar test before mixing a slurry.
- Recommended mixing order: Water, polymers, pesticides, SuperSede Soybean, fertilizers, then remaining water.
